1. Getting Started

1. Getting Started

1.1 Introduction

This is the Getting Started Guide to the ETAS License and Download Portal. This document is an introduction to terminology and concepts, and a basic primer on tasks you can perform with the Portal. It is meant for use by software customers to allow them to track and manage their License assets and Downloads.

Technical Support is available to customers with current maintenance contracts. Please include the following information with your inquiry:

- Product Name and Version
- Activation ID
- Operating System Name and Version

Contact the support center for your area:

<http://www.etas.com/en/hotlines.php>

A screenshot of the ETAS License & Download Portal login page. The page features the ETAS logo at the top left with the tagline "DRIVING EMBEDDED EXCELLENCE". The main heading is "ETAS License & Download Portal". Below this is a "Login" section with three radio button options: "With Username (Your Email)" (which is selected), "With Entitlement ID", and "With Activation ID". There are input fields for "Username" and "Password", and a dropdown menu for "Language" currently set to "English (United States)". At the bottom right, there is a "Forgot password?" link and a blue "Log in" button.

1. Getting Started

1.1 Introduction

You can use the ETAS License and Download Portal to create and manage licenses and to download software packages:

- Generation and tracking of software licenses
- Transparency of license terms, such as maintenance expiry dates
- Flexible login capacity
- Download of purchased software packages, Service Packs, Upgrades and Hotfixes
- Support for several license-related transactions, both before and after license generation, such as...
 - Activation
 - Return
 - Rehost
 - Consolidation
 - Viewing and printing Entitlements

The screenshot shows the ETAS License & Delivery Portal interface. The header includes the ETAS logo and navigation links: Home | Activation & Entitlements | License Support | Downloads. The main content area is titled "Welcome to the ETAS License & Delivery Portal" and features three main sections:

- Current License Entitlements**: A table listing activation IDs, products, and last modified dates.
- Available Downloads**: A section for downloading software, including links for INCA, INTECRIO, and ISOLAR, and a note that a license file is required for activation.
- Recently Released Files**: A table listing descriptions and dates of recent releases.

Activation ID	Product	Last modified

1. Getting Started

1.2 Access to the ETAS License and Download Portal

a) Access to manage your ETAS Licenses

<https://license.etas.com/>

There are several options to enter the portal:

With Username and Password

You will be enabled to see and manage all Activations in all the Entitlements assigned to your account (e.g. for a tool coordinator responsible for several Entitlements)

With Entitlement ID

Will allow you to see and manage all Activations in the entered Entitlement (e.g. for a company with only one Entitlement)

The screenshot shows the ETAS License & Download Portal login interface. At the top left is the ETAS logo with the tagline 'DRIVING EMBEDDED EXCELLENCE'. The main heading is 'ETAS License & Download Portal'. Below this is a 'Login' section with three radio button options: 'With Username (Your Email)' (selected), 'With Entitlement ID', and 'With Activation ID'. There are input fields for 'Username' and 'Password', and a 'Language' dropdown menu currently set to 'English (United States)'. A 'Forgot password?' link and a blue 'Log in' button are positioned to the right of the password field. Below the login section are three expandable menu items: 'User Management', 'Product Evaluation', and 'Access to Non-Public Downloads', each with a brief description and a 'Please click here.' link.

1. Getting Started

1.2 Access to the ETAS License and Download Portal

With Activation ID

Will allow you to see and manage the entered Activation (e.g. for a user who is given the information by a tool coordinator to allow him/her to activate one license)

You are of course, free to use whichever method suits you best at the moment!

To **enable** also the **Download functions** in the Portal, a personal user account is needed. How to create please see on the following sites.

A screenshot of the ETAS License & Download Portal. The page features the ETAS logo at the top left with the tagline "DRIVING EMBEDDED EXCELLENCE". The main heading is "ETAS License & Download Portal". Below this is a "Login" section with three radio button options: "With Username (Your Email)" (selected), "With Entitlement ID", and "With Activation ID". There are input fields for "Username" and "Password", and a "Language" dropdown menu currently set to "English (United States)". A "Forgot password?" link and a blue "Log in" button are positioned to the right of the password field. Below the login section are three expandable panels: "User Management" with a link to add users, "Product Evaluation" with a link to evaluate products, and "Access to Non-Public Downloads" with a link to register for downloads.

1. Getting Started

1.2 Access to the ETAS License and Download Portal

b) Enable Downloads in the Portal

- If you already have a valid ETAS FNO Customer Portal User with Password, you can extend your User to access also the Downloads in the Portal (valid Activation ID or Entitlement ID is needed).
- If you do not have a valid user and you want to evaluate ETAS Software you can use the **Product Evaluation** link to register yourself and select an available Evaluation Product.
- If you only need access to the ETAS Non-Public Downloads you can use the **Access to Non-Public Downloads** to register yourself.
- If you are already registered for Evaluations or for Downloads you are automatically also enabled to access the Non-Public Downloads.

User Management ⓘ

You want to add a user to the existing License Entitlements of your company? Please click [here](#).

Product Evaluation ⓘ

You want to evaluate an ETAS product. Please click [here](#).

Access to Non-Public Downloads ⓘ

You need a registration to complete a download (e.g. Whitepaper, Known Issues Report)? Please click [here](#).

1. Getting Started

1.3 Registration

1.3.1 User Management

With this function it is possible to add another user to an account.

For this purpose, an already existing Entitlement or Activation ID from the account is required for authentication.

Please click **“here”** to start the process.

The screenshot shows the ETAS License & Download Portal login interface. At the top left is the ETAS logo with the tagline "DRIVING EMBEDDED EXCELLENCE". The main heading is "ETAS License & Download Portal". Below this is a "Login" section with three radio button options: "With Username (Your Email)" (selected), "With Entitlement ID", and "With Activation ID". There are input fields for "Username" and "Password", and a "Language" dropdown menu currently set to "English (United States)". A "Forgot password?" link and a blue "Log in" button are located to the right of the input fields. Below the login section, there are three expandable menu items, each with a chevron icon: "User Management" (highlighted with a red box), "Product Evaluation", and "Access to Non-Public Downloads". Each menu item includes a brief description and a "Please click here." link.

1. Getting Started

1.3 Registration

1.3.1 User Management

In order to perform the registration, the mandatory fields in the form **Contact Information** must be filled in. Optional fields are marked with (optional).

For the authentication of the account association an Entitlement or Activation ID from the existing account must be entered.

Please note: The user credentials will be sent to the e-mail address specified here. Only business e-mail addresses are allowed.

The screenshot shows the ETAS User Management registration page. At the top left is the ETAS logo with the tagline "DRIVING EMBEDDED EXCELLENCE". At the top right, there is a language selector set to "English". The main heading is "User Management". Below this is a "Contact Information" section with a sub-heading and a note: "To add a new user to your company's existing license entitlements, we need the following user information. We pay strict attention to the privacy of your data (see Privacy Policy)." The form includes a "Type of ID" section with radio buttons for "Activation ID" (selected) and "Entitlement ID". Below this are input fields for "Activation | Entitlement ID", "First name", "Last name", "E-mail, business" (with an information icon), "Phone (optional)", "Company", "Street & house number", "City", "Postal code", "State (optional)", and "Country" (a dropdown menu currently showing "United States"). A "Privacy policy and further information" section contains two checkboxes: "I would like to receive information about new downloads on offers (optional)" and "Privacy Policy read and agreed". A blue "Register Account" button is located at the bottom right of the form. The footer contains copyright information: "© ETAS 2018 Sitemap Terms of Use & Privacy Policy Help".

1. Getting Started

1.3 Registration

1.3.1 User Management

The registration is always completed with a message.

If the user account has been created, you will receive the corresponding message and an e-mail with the login information will be sent to the specified e-mail address.

If you do not receive an e-mail, please check

- The e-mail address provided
- Your spam folder

If these are not the causes, please contact our support.

If a user account already exists for the specified e-mail address and you may not be aware of this, you can use the password reset function to use this user account again.

Your user account has been created

What's the next step?

You will receive an e-mail with your access data for the ETAS License & Download Portal.

The provided password is valid for 48 hours. Please change the provided password to a personal password during your first login.

Login

You have not received an e-mail? Please check your spam filter for the e-mail address etas.licensing@etas.com or contact our Support.

This user already exists.

What's the next step?

You have forgotten your Password? If you need help, please contact our Support.

Login

1. Getting Started

1.3 Registration

1.3.2 Product Evaluation

With this function it is possible to register for evaluation of an ETAS Software Product.

If the software you want to evaluate already uses FlexNet embedded, you will receive an Activation ID which you can use with ETAS License Manager on your PC to activate your license.

If the software is based on FlexNet Publisher, you will be asked to enter the MAC-address of your computer.

Please click **“here”** to start this process.

The screenshot shows the ETAS License & Download Portal. At the top left is the ETAS logo with the tagline 'DRIVING EMBEDDED EXCELLENCE'. The main heading is 'ETAS License & Download Portal'. Below this is a 'Login' section with three radio button options: 'With Username (Your Email)' (selected), 'With Entitlement ID', and 'With Activation ID'. There are input fields for 'Username' and 'Password', and a 'Language' dropdown menu set to 'English (United States)'. A 'Forgot password?' link and a blue 'Log in' button are also present. Below the login section are three expandable menu items: 'User Management', 'Product Evaluation', and 'Access to Non-Public Downloads'. The 'Product Evaluation' item is highlighted with a red rectangular border and contains the text 'You want to evaluate an ETAS product. Please click here.'

1. Getting Started

1.3 Registration

1.3.2 Product Evaluation

The first step is to select the product you want to evaluate.

Select the product you would like to evaluate and click **“Next”**.

The selection list contains all ETAS products that are offered at this time as evaluation and via this delivery path. If the ETAS Product you would like to evaluate is not listed, please contact ETAS Sales.

The screenshot shows the ETAS website interface for product evaluation. At the top left is the ETAS logo with the tagline 'DRIVING EMBEDDED EXCELLENCE'. At the top right, there is a language selection menu showing 'English' with a dropdown arrow. The main heading is 'Product Evaluation', followed by the sub-heading 'Product Choice'. Below this, a text prompt reads 'Please choose the ETAS product you want to evaluate.' This is followed by a dropdown menu with 'INCA-V7.2' selected. A blue 'Next' button is positioned to the right of the dropdown menu.

1. Getting Started

1.3 Registration

1.3.2 Product Evaluation

Note: This step is only required if the software uses FlexNet Publisher license technology. Otherwise, you will not see this field.

You will be asked to enter the MAC address of the computer on which you want to evaluate.

How to determine the MAC address of the computer:

1. Open the command prompt window.
2. Enter the command "ipconfig /all".
3. Search for the parameter "Physical Address" for your Ethernet adapter and take note of the specified value (in this example: 00-05-9A-3C-7A-00)

Unique assignment of the evaluation license

The evaluation license is tied to your hardware for security reasons. Therefore we need the MAC address of the computer on which you want to evaluate the ETAS software.

By entering the MAC address you will quickly receive a personalized evaluation license.

MAC address

The 'physical address' of your primary network adapter.

1. Getting Started

1.3 Registration

1.3.2 Product Evaluation

The last step on this page is to acknowledge our terms for evaluation.

To create a user account and receive evaluation software, you must accept the **Privacy Policy** and **License Terms** after reading them.

We would be pleased to inform you about news concerning the product line you have selected. If you wish to be informed, please select the corresponding checkbox.

To complete this process click on the button **“Register Account”** or if you already have an account click on **“Complete evaluation”**.

Privacy policy and further information

- I would like to receive information about new downloads offered for this product (optional)
- [Privacy Policy](#) read and agreed
- I have read the [Loan and Licence Contract](#) and accept it.

[Register Account](#)

1. Getting Started

1.3 Registration

1.3.2 Product Evaluation

If your evaluation period is over and you decided the order a product, you can reuse your user by moving that to the new customer account through the following link:

<https://license.etas.com/LandingPage/htm/moveuserlogin.jsp>

Enter your credentials and press **“Login”**.

On the next page you can enter the Entitlement ID, which you got from ETAS via mail.

To complete this process click on the button **“Execute”** and your user will be moved to the right account.

The screenshot shows the 'Moving a user' page on the ETAS website. The page has a blue header with the ETAS logo and 'DRIVING EMBEDDED EXCELLENCE' on the left, and a language selector for 'English' on the right. The main content area is titled 'Moving a user'. Below the title is a form box labeled 'User data'. Inside this box, it says 'Please enter the user data.' and contains two input fields: 'Username' with 'User ID' and 'Password' with 'Password'. A blue 'Login' button is positioned at the bottom right of the form box.

The screenshot shows the 'Moving a user' page on the ETAS website, which is the second step in the process. It has the same blue header as the previous page. The main content area is titled 'Moving a user'. Below the title is a form box labeled 'Target'. Inside this box, it says 'Please enter the target Entitlement ID.' and contains one input field labeled 'Target Entitlement ID' with 'Entitlement-ID' entered. A blue 'Execute' button is positioned at the bottom right of the form box.

1. Getting Started

1.3 Registration

1.3.3 Access to Non-Public Downloads

With this function it is possible to create an account to have access to Non-Public Downloads.

Please click **“here”** to start this process in your browser.

The screenshot shows the ETAS License & Download Portal. At the top left is the ETAS logo with the tagline "DRIVING EMBEDDED EXCELLENCE". The main heading is "ETAS License & Download Portal". Below this is a "Login" section with three radio button options: "With Username (Your Email)" (selected), "With Entitlement ID", and "With Activation ID". There are input fields for "Username" and "Password", and a "Language" dropdown menu currently set to "English (United States)". A "Forgot password?" link and a blue "Log in" button are positioned to the right of the password field. Below the login section are three expandable cards: "User Management" with a link to add users, "Product Evaluation" with a link to evaluate products, and "Access to Non-Public Downloads" which is highlighted with a red border and contains a link to register for downloads.

1. Getting Started

1.3 Registration

1.3.3 Access to Non-Public Downloads

On the next page you have to enter your contact details. If you already have a user account, please skip the entry of your contact data with **“Login”**.

The mandatory fields in the form **Contact Information** must be filled in. Optional fields are marked with (optional).

Please note: The user credentials will be sent to the e-mail address specified here. Only business e-mail addresses are allowed.

The last step on this page are the **privacy policy** and other information.

Create user account for access to non-public documents

Do you already have an ETAS user account? Then you can already access the non-public documents. [Login](#)

Contact Information

In order to provide you with access to non-public documents, we need your contact details. We pay strict attention to the privacy of your data (see [Privacy Policy](#)).

1.4 License Technology

1.4.1 Difference between FlexNet Publisher and FlexNet Embedded

When viewing licenses or entitlements in the license portal it is important to distinguish between the license types. The column “type” shows an icon indicating the technology used.

C FlexNet Publisher (FNP)

- A white “C” on red background indicates a certificate based license, which means it is a FlexNet Publisher based license.
- Activation of a **FNP** license is done using the Activation ID in the **ETAS License Portal**.
- FNP licenses are then saved as *.lic files which are deployed either onto the target PC or onto a license server. The license file itself contains the license information in readable format.

E FlexNet Embedded (FNE)

- A white “E” on green background indicates a FlexNet Embedded license
- Activation of a **FNE** license is done using the Activation ID in **ETAS License Manager tool** on the target PC
- FNE licenses are not stored in readable files but in a so called “trusted storage”. This is a data storage on the customer’s device which is secured against manipulation or copying using additional measures.
- Therefore ETAS License Manager offers either online activation or offline activation. The latter can be used if the device is not connected to the internet

1. Getting Started

1.4 License Technology

License Technology change

- ETAS has used FlexNet Publisher technology for many years. From September 2020 onwards, FlexNet Embedded will be introduced. New software releases will only be shipped with FlexNet Embedded technology implemented in future.
- FlexNet Publisher license technology will be further supported according to the terms and conditions for existing software versions

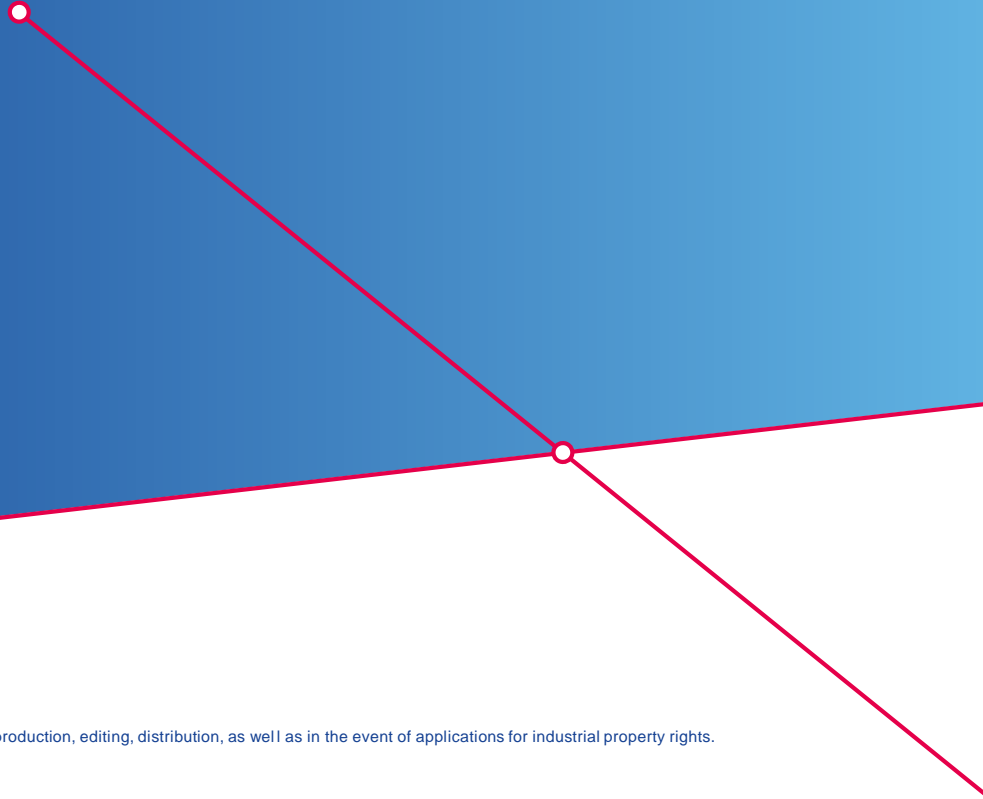

License Right Changes

- ETAS FNP License rights are stored in *text* license files
- ETAS FNE License rights are stored in in Trusted Storage

End User Interaction Changes

- With FlexNet Publisher, an end user is expected to run the license activation utility. Typically this involves typing in an activation code, installing a license text file or interacting with an application's installer.
- With FlexNet Embedded, there is no expectation of a user interacting with a user interface. The core toolkit makes no assumptions about a command prompt or window manager being available. A device can power up, possibly contacting a back-office server, and checks its license rights to determine the behavior, functionality, capacity, etc., that the device supports.

2. FNP - Managing Entitlements

2. FNP - Managing Entitlements

2.1 View and Manage Activations

- The view Activations and Entitlements will give you an overview of all line items that still have copies left for activation

- You can see details on Activation ID, Entitlement ID, product, license model, number of copies ...

The screenshot shows the ETAS License & Delivery Portal. The navigation menu includes 'Home', 'Activation & Entitlements', 'License Support', and 'Downloads'. The 'List Entitlements' link is highlighted with a red circle. Below the navigation, there are sections for 'Current License Entitlements' and 'Available Downloads'. The 'Current License Entitlements' section contains a table with columns for Activation ID, Product, and Last modified. The 'Available Downloads' section shows a message: 'No products are available for download at this time. Please check again later.'

The screenshot shows the 'List of your Entitlements' page. It features a table with columns for Type, Activation ID, Entitlement ID, License model, Original quantity, Available quantity, Total quantity, Maintenance, Entitlement state, Product, and Expiration. The table contains 13 rows of data, including various license models like 'Embedded Counted', 'FPGA-LIC-MP', and 'ELIC-ME13'.

2. FNP - Managing Entitlements

2.3 License Lifecycle

Licenses have a lifecycle that extends beyond activation and fulfillment (license delivery). Different events at your end (e.g. purchase of new machines, crash of a hard disc...) can affect the lifecycle. The following kinds of license change management are supported by the ETAS License Portal:

- Retrieve an existing license key (e.g. if the old one is lost due to accidental deletion etc.). See [Retrieve License Key](#) for details.
- Specify a new license server Host ID, a new MAC address or a new Windows User Name for a license (e.g. when you replace a computer or assign a license to another user). See [Rehost](#) and [Return](#) for details.
- Consolidate existing licenses into one license file for easier management. See [Consolidation](#) for details.

2. FNP - Managing Entitlements

2.4 Upgrades

Activations derived from product upgrades:

- If your licenses are covered by a valid maintenance contract, you can receive product upgrades. Upgrading from one major version to another (e.g. from INCA V6.x.x to INCA V7.x.x) will require the generation of a fresh license key as the keys are bound to the product version.
- When the upgrade is performed, ETAS will create a new activation to provide a license for the new product version. And it will be automatically activated for the Host of the previous license.

- If old version licenses have not been activated and a upgrade is done, you can activate the license for the new version as described on page 11-15
- Such line items can be distinguished through a special icon:

2. FNP - Managing Entitlements

2.5 Where do I find a list of all activated licenses?

- Go to **“License Support”**
- Go to **“List Licenses”**

Please note: Evaluation licenses are not visible in the portal!

The screenshot shows the ETAS License & Download Portal. The navigation bar includes 'Home', 'Activation & Entitlements', 'License Support', and 'Downloads'. The main content area is titled 'Welcome to the ETAS License & Download Portal'. It features three main sections: 'Current License Entitlements', 'Available Downloads', and 'Recently Released Files'. A red circle highlights the 'License Support' link in the navigation bar, and another red circle highlights the 'List Licenses' link in the 'License Support' dropdown menu. A red arrow points from the 'List Licenses' link in the dropdown to the 'List Licenses' link in the 'License Support' dropdown menu. The 'Current License Entitlements' section contains a table with columns for 'Activation ID', 'Product', and 'Last modified'. The 'Available Downloads' section contains a 'Public Downloads' link and a note: 'To activate the software, you need a license file.' The 'Recently Released Files' section contains a 'Description' and a 'Date' column, with a note: 'No records found for this account.'

Activation ID	Product	Last modified
[REDACTED]	[REDACTED]	Mar 16, 2020
[REDACTED]	[REDACTED]	Mar 16, 2020
[REDACTED]	[REDACTED]	Mar 16, 2020
[REDACTED]	[REDACTED]	Mar 16, 2020

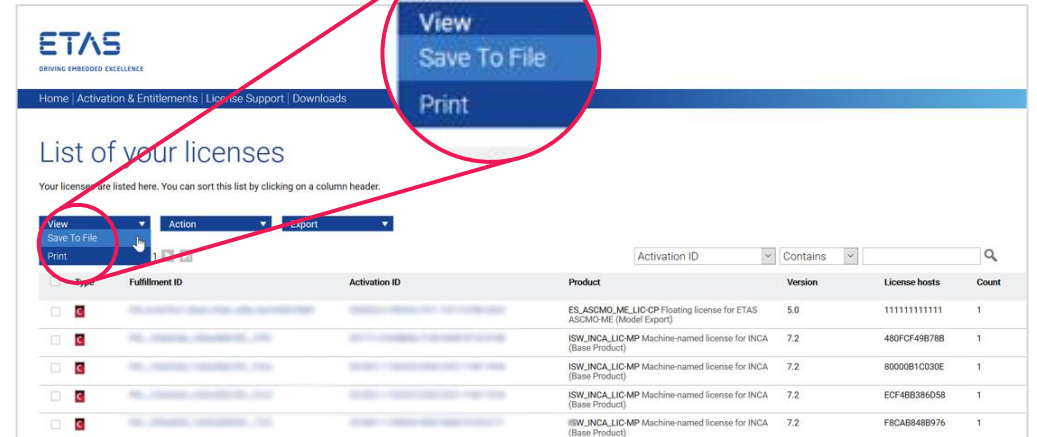

2. FNP - Managing Entitlements

2.6 How can I retrieve a license key for an existing and activated license?

- Go to **“License Support”** >> **“List Licenses”**
- Choose the License for which you want to retrieve the license key
- Click on **“View”** and **“Save to File”**

Please note: License keys for inactive fulfillments cannot be saved!

2. FNP - Managing Entitlements

2.7 Rehost

A rehost enables you to specify a new license server Host ID or MAC address for a license. This may be needed when you replace a computer.

A rehosted license has a new Fulfillment ID, but retains the original Activation ID.

If only some of the original fulfillments are rehosted, a second (new) fulfillment will be generated for the copies that are not rehosted with the original Activation ID.

E.g. this happens, if you split Concurrent licenses between two servers.

2. FNP - Managing Entitlements

2.7 Rehost

- Go to **“License Support”**
- Select a Fulfillment ID and click **“Action”** >> **“Rehost”**

The screenshot shows the ETAS License Support interface. At the top, there is a navigation bar with 'Home | Activation & Entitlements | License Support | Downloads'. Below this is a section titled 'List of your licenses' with a subtext: 'Your licenses are listed here. You can sort this list by clicking on a column header.' There are controls for 'View', 'Page 1 of 1', and 'Export'. A dropdown menu is open under the 'Action' button, showing options: 'Action', 'Return', 'Rehost', 'Renew', and 'Consolidate'. The 'Rehost' option is highlighted. A red circle highlights the 'Action' dropdown menu, and another red circle highlights the 'Rehost' option in a separate callout box. Below the menu is a table of licenses with columns: Type, Fulfillment ID, Activation ID, Product, Version, and License hosts.

Type	Fulfillment ID	Activation ID	Product	Version	License hosts
C	ES_ASCMO_ME_LIC-CP Floating license for ETAS ASCMO-ME (Model Export)	...	111111111111
C	ISW_INCA_LIC-MP Machine-named license for INCA (Base Product)	...	480FCF49B78B
C	ISW_INCA_LIC-MP Machine-named license for INCA	...	80000B1C030E

2. FNP - Managing Entitlements

2.7 Rehost

- Enter the Host ID by clicking on green “+” and confirm with “OK”
 - Click on “Rehost”
 - Save the license file and click on “Complete”
- Please note: The rehost facility is available should a user have a new PC or server but limited to:

- 1 rehost per year for User-Named Licenses
- Concurrent and Machine named: 1 per 6 months

And you will not be able to rehost obsolete Licenses.

License Summary

Please review the licenses below and click Complete to return to Manage

License details:

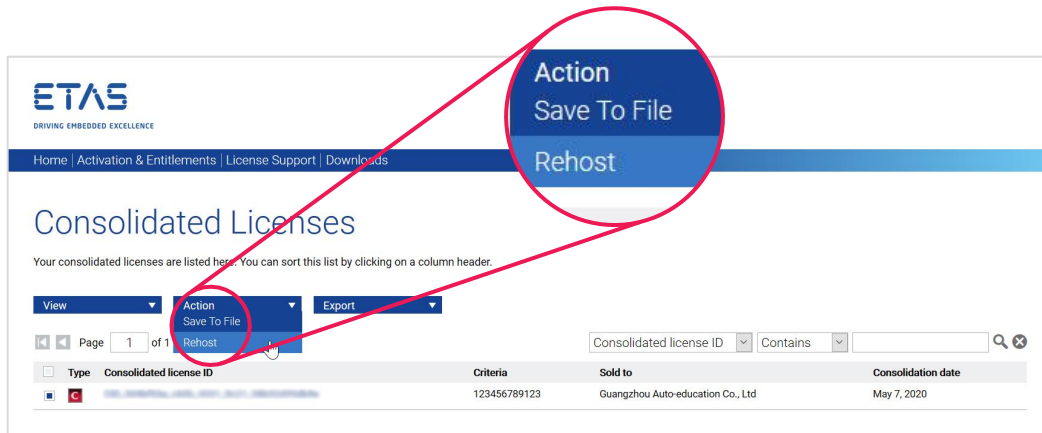

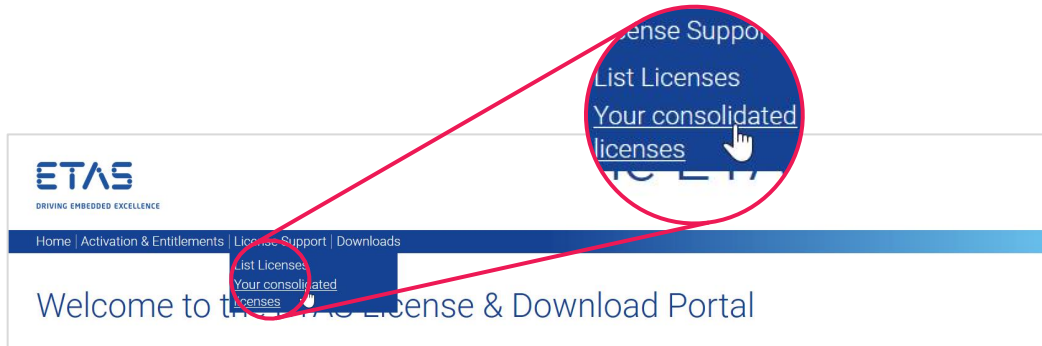

Sold to:
Guangdong Auto-education Co., Ltd

Activation ID	Product	Version	License hosts	Count	User ID
	ISW_INCA_LIC_MP Machine named license for INCA (Base Product)	7.2	123456789123	1	

View Save To File Print

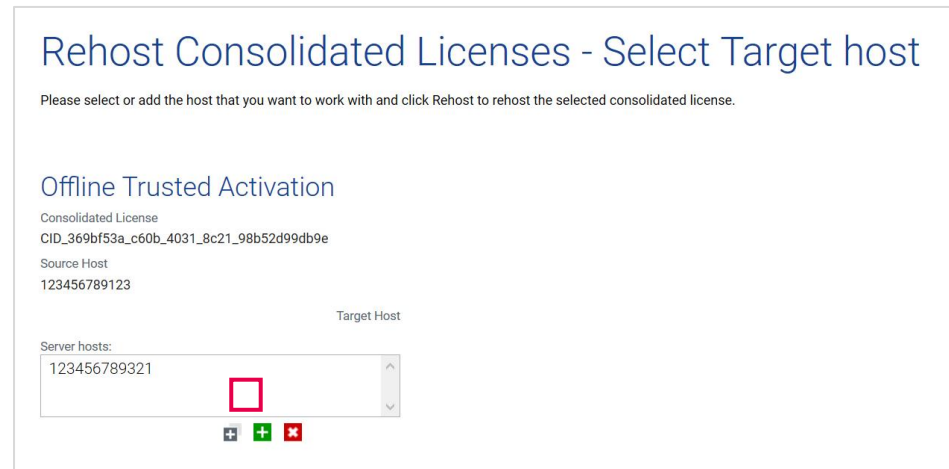

2. FNP - Managing Entitlements

2.8 Rehost Consolidated Licenses

You can rehost consolidated licenses:

- Go to **“Consolidated Licenses”**
- Select a consolidation and click **“Rehost”**
- Enter the Host Address by clicking on green **“+”** and confirm

2. FNP - Managing Entitlements

2.9 Return

A return refers to the process of moving license rights from a user to another user. By returning a license the number of available copies in the ETAS License Portal increases by the amount of returned licenses, so a new license key can be generated.

- Go to **“Manage Licenses”**
- Select a Fulfillment ID and click **“Return”**
- Confirm with **“Return”**

Home | Activation & Entitlements | License Support | Downloads

List of your licenses

Your licenses are listed here. You can sort this list by clicking on a column header.

View [dropdown] Action [dropdown] Export [dropdown]

Page 1 of 1

Rehost [dropdown] Activation ID [input] Contains [dropdown] [input] [input] Advanced Search

Type	Fulfillment ID	Activation ID	Product	Version	License hosts	Count	User ID
[checkbox]	[input]	[input]	[input]	7.2	123456789321	1	[input]

Please note:

- For the returned fulfillment no license file can be saved any more.
- Return is only allowed for User named licenses, once a year.
- The difference to a rehost is that the license is not activated again

2. FNP - Managing Entitlements

2.10 Consolidation

You can consolidate existing licenses into one license file:

- Go to **“Manage Licenses”**
- Select Licenses
- Click **“Consolidate”**

Please note: A Consolidation is only possible for licenses where the “Server Host ID”s are similar.

The screenshot shows the ETAS license management interface. A red circle highlights the 'Consolidate' option in the 'Action' dropdown menu. Another red circle highlights the 'Rehost', 'Renew', and 'Consolidate' options in a larger menu. A red box highlights the 'License hosts' column in the table below, which contains the same value for all rows. A red arrow points from the 'Consolidate' option to the table. The text 'Same host!' is written in red next to the table.

Type	Fulfillment	Activation ID	Product	Version	License hosts	Count	User ID
ISW_INCA_LIC_MP	Machine-named license for INCA (Base Product)	7.2	123456789321	1

3. FNE - Managing Entitlements

3.2 View and Manage Devices

A device is a hardware or software component that uses FlexNet Embedded to license its products. FlexNet Embedded devices connect to FlexNet Operations to manage their ownership, state, features, and more. Examples of devices are laptops running ETAS software or measurement devices (“blue boxes”).

Home | Activation & Entitlements | License Support | **Devices**

Welcome to the ETAS License & Download Portal

Current License Entitlements			See all
Activation ID	Product		Last modified

A device is identified by a Device ID and its type. Device types are:

- Standalone Device
E.g: FlexNet Embedded device that connects to FlexNet Operations, which manages the device.
- Server
E.g: FlexNet Embedded server that communicates with FlexNet Operations to manage device ownership, state, and features for a collection of served devices.
(When a FlexNet Embedded server is used, its served devices connect with the FlexNet Embedded server rather than connecting directly to FlexNet Operations.)
- Served Device
E.g: FlexNet Embedded device that is managed via a FlexNet Embedded server. In FlexNet Operations, served devices are essentially read-only entities.

3. FNE - Managing Entitlements

3.2 View and Manage Devices: List Devices

On clicking “Devices” in the menu bar, the devices page will open. All registered devices in FNO will be shown in a list. It displays Name, ID, Type, Account Name, Licenses and the modification date.

You will see the following page:

Search <input type="text"/> Cancel		This is a list of devices.

3. FNE - Managing Entitlements

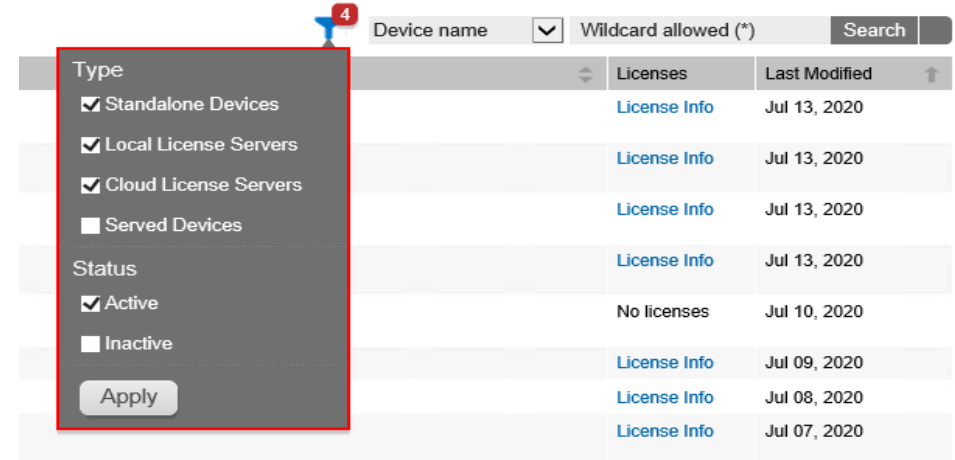

3.2 View and Manage Devices: Filtering the Devices List

To quickly reduce the size of the devices displayed on the Devices page, you can filter it by device type and activation status.

To filter the devices list

1. Hover the cursor over the filter icon to display the filter selection list.
2. Select the device Type (or types) and Status you want to view.
3. Click “Apply” to filter the devices according to your selection(s). The number in the red bubble indicates how many filters are active.
4. You can also search a filtered devices list.

3. FNE - Managing Entitlements

3.2 View and Manage Devices: Searching for Devices

Existing devices can be easily located by performing a search on the Devices page. You can perform a simple search on a single attribute, or an advanced search on multiple attributes. For both searches, you can use the * wild card to match zero or more characters.

Simple Search

1. On the Devices page, click the drop-down list next to the filter icon and select the search criterion.
2. Type the search string in the text field next to the drop-down list.
3. Click Search.

Advanced Search

1. On the Devices page, click the + icon (next to the Search button) to open the Advanced Search window.
2. Type search criteria in the attribute text fields.
3. Click Search.

The ETAS License & Download Portal will show a list of the devices that match your search criteria on the Devices page.

3. FNE - Managing Entitlements

3.2 View and Manage Devices: Previewing Licenses on a Device

In the Devices page list, the licenses column enables you to quickly view the licenses on a device and decide whether to view that device in more detail. A preview pane shows up to ten licenses on the device, and includes a link to view the rest of the licenses if there are more than ten on that device.

Type	Account Name	Licenses	Last Modified

3. FNE - Managing Entitlements

3.2 View and Manage Devices: Upload Capability Request

Whenever your end device cannot connect directly to the internet, this functionality becomes relevant.

Example: You use the “Offline Activation” or “Offline Return” in ETAS License Manager (LiMa). This page allows you to manually upload the data provided by LiMa.

The uploaded files are called “Capability Request” files.

To upload a Capability Request for a device:

1. Select “Devices” -> “Upload Capability Request” from the menu bar
2. Click “Browse...” and select the Capability Request on your local system. (The exact controls vary depending on the browser you are using.)
3. Click “Upload”

After the Capability Request has been processed, you can download a “Capability Response” file from the portal (look in your browser’s download area). This Capability Response file needs to be transferred back to the device where the Capability Request was created. The response is then processed in the respective dialog in ETAS License Manager.

DRIVING EMBEDDED EXCELLENCE

[Home](#) | [Activation & Entitlements](#) | [License Support](#) | [Devices](#)

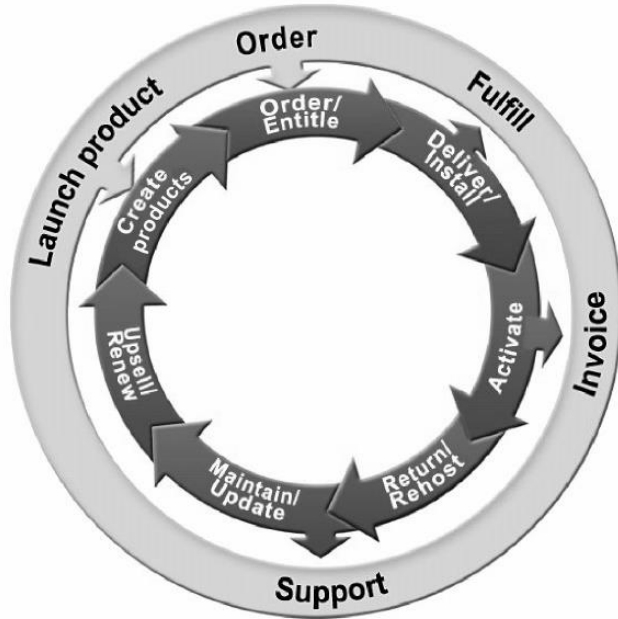

Upload Capability Request

Locate and send the offline request file. The browser will prompt you to save the response file.

3. FNE - Managing Entitlements

3.3 License Lifecycle

The delivery/installation and activation stages of the FlexNet Embedded license lifecycle are covered in this guide.

- Create Products
 - Create product definitions that are used to generate licenses
- Order/Entitle
 - Define a customer's rights to obtain licenses for your products
- Deliver/Install
 - Deliver the application software to the customer and install that software
- Activate
 - Deliver licenses to the customer
- Return/Rehost
 - Manage license transfers from one user or system to another
- Maintain/Update
 - Deliver software and license updates to the customer
- Upsell/Renew
 - Renew customer licenses, or sell the customer additional product functionality

3. FNE - Managing Entitlements

3.4 Activation

- **Online Activation**

- The ETAS License Manager software (LiMa) generates a Capability Request for entitled features, then sends the request to FlexNet Operations via the Internet. FlexNet Operations sends a Capability Response to the device, which processes the response and places the license into trusted storage.
- No manual interaction with ETAS License & Download Portal is required

- **Offline Activation**

- The ETAS License Manager software (LiMa) generates a Capability Request file, which is manually transferred to a connected system from which it can be uploaded to FlexNet Operations. The Capability Response is downloaded from FlexNet Operations and transferred to the ETAS license management software (LiMa) for processing.
- Refer to section 3.2 - Upload Capability Request and Generate Capability Response in the ETAS License & Download portal

3. FNE - Managing Entitlements

3.5 Return and Rehost

- **Offline Return**

- The ETAS License Manager software (LiMa) generates a Capability Request file, which is manually transferred to a connected system from which it can be uploaded to FlexNet Operations. The Capability Response is downloaded from FlexNet Operations and transferred to the ETAS License Manager software (LiMa) for processing.
- LiMa processes the Capability Response and the license is removed from the device. LiMa generates the confirmation file which needs to be uploaded to FlexNet Operations.
- After the upload of the Confirmation Response in FlexNet Operations, the license is available again for activation
- Online Return is not supported

- **Manual Return**

- If the customer PC is defect or lost, the customers should inform ETAS customer support for manual return processes

- **Rehost (only possible through return + new activation)**

- After the return process, the license can be activated on another device.

3. FNE - Managing Entitlements

3.6 Migration

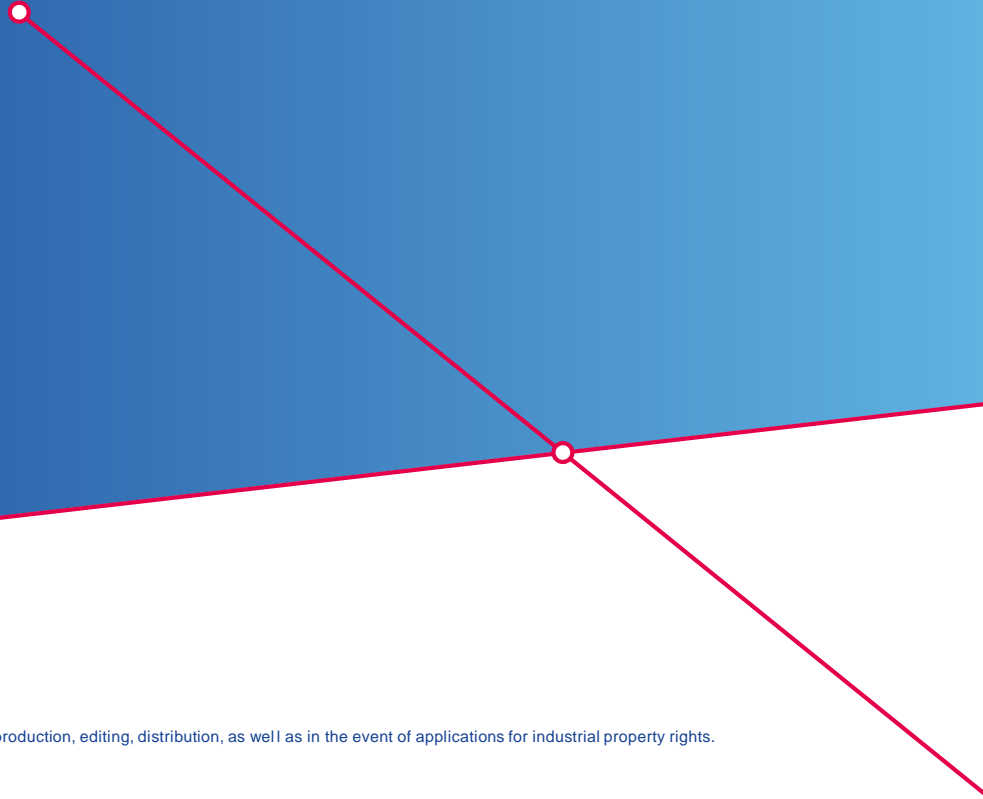

- **Online Migration**

- The ETAS License Manager software (LiMa) generates a Migration Request for entitled features, then sends the request to FlexNet Operations Service via the Internet. FlexNet Operations Service processes the response and places upgraded FNE licenses into trusted storage.
The old activation ID will become obsolete and a new activation ID is assigned during migration.
- No manual interaction with ETAS License & Download Portal is required

- **Offline Migration**

- The ETAS License Manager software (LiMa) in the offline PC generates a Migration Request file, which should be manually transferred to a PC which can connect to FlexNet Operation Service through the internet.
- The online PC uploads the request file into the Flexnet operation service through Lima, downloads the response file and transfers the response file to the offline PC
- The offline PC processes the response file, which will install the upgraded FNE license into the trusted storage
- No manual interaction with ETAS License & Download Portal is required

4. Managing Downloads

4. Managing Downloads

4.1 View Available Downloads

- The view “**Home**” will give you an overview of available downloads and recently added download files of your ordered product(s).
- Please be aware of by selecting one of the recently released files, it will takes up to 10 seconds until to get files data.

The screenshot shows the ETAS License & Download Portal. The header includes the ETAS logo and navigation links: Home | Activation & Entitlements | License Support | Downloads. The main content area is titled "Welcome to the ETAS License & Download Portal" and features a search bar for "Public Downloads for Software".

There are three main sections:

- Current License Entitlements**: A table with columns for Activation ID, Product, and Last modified. It lists several licenses for products like ES_ASSET DEVELOPER LIC-UP, ISW_INCA LIC-MP, ISW_INCA LIC-CP, and ES_ASSET DEVELOPER LIC-UP.
- Available Downloads**: A section with a search bar and a list of products: INCA, INTECRIO, and ISOLAR. Below this is a "Public Downloads" section with a note: "To activate the software, you need a license file."
- Recently Released Files**: A table with columns for Description and Date. It lists files such as INCA_7.2_SP13_Multilingual, ERRORCELL, INCA_V7.2_SP16_english, INCA_V7.2_Whats_new_english, INCA_V7.2_ServicePack_Release_Notes_english, and INCA_7.2_Release_Notes_english.

4. Managing Downloads

4.1 View Available Downloads

- For accessing to available downloads area, you can either select a specific product family from the Home -> Available Downloads or can select the same view over the Menu item Downloads -> Available Downloads.

- By selecting one product family, you get the lists of available download packages regarding to your product.

The screenshot shows the ETAS Download Portal. A red circle highlights the 'Downloads' menu in the top right, which includes 'Available Downloads', 'Recent Releases', 'Recently Released Files', and 'Search'. Another red circle highlights the 'Available Downloads' link in the top navigation bar. Below the navigation, there are sections for 'Current License Entitlements' and 'Recently Released Files'. The 'Available Downloads' section is highlighted with a red circle and contains a table of product lines.

Product	Last modified
PERU_Test_3	May 11, 2020
ISOLAR 8_ELIC-ME	May 11, 2020
INCA FINE Übungen	May 11, 2020
ES_ASSET_DEVELOPMENT_UP	Apr 22, 2020
ISW_INCA_LLIC-MP	Apr 20, 2020

The screenshot shows the ETAS Downloads page. The page title is 'Downloads' and the subtitle is 'Your product lines, available for download, are listed here. Please click on the desired product line to have access to the download.' Below the text, there is a 'Change Account' dropdown menu and a list of product lines: INCA, INTECRIO, ISOLAR, and Public Downloads.

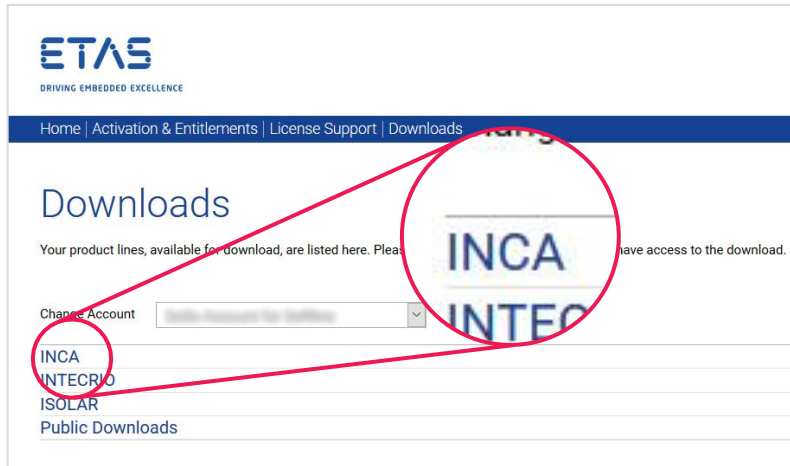

4. Managing Downloads

4.1 View Available Downloads

- Each product belongs to a product family and all download packages are assigned to the corresponding product family.

- By selecting one product family, you get the lists of available download packages regarding to your product.

4. Managing Downloads

4.1 View Available Downloads

Now you can see in the tab “**New Versions**” the current available download packages for your product. Older download packages will be available in the “**Previous Versions**” only in the case if you bought older versions of the product in the past.

- For download of files please select a filename.

The screenshot shows the ETAS website's 'Download Packages' page for the 'INCA' product. The page has a blue header with the ETAS logo and navigation links: Home | Activation & Entitlements | License Support | Downloads. Below the header, the title 'Download Packages' is displayed, followed by a sub-header 'INCA'. There are two tabs: 'New Versions' (selected) and 'Previous Versions'. A table lists the available download packages:

Version	Description
V7.3 SP15	ISW_INCAKnown Issue Report_V7.3 SP15
V7.2 SP 16	ISW_INCA[Software_V7.2 SP 16

4. Managing Downloads

4.1 View Available Downloads

Each download package contains a number of files. By selecting a download package, you get the files provided as list again, but please be aware, it will takes up to 10 seconds until to get files displayed. If do that for the first time, you need to accept the EULA once.

- For more description of a file, please click on “+” to get more data

The screenshot shows the ETAS software download interface. At the top, there is a navigation bar with 'Home | Activation & Entitlements | License Support | Downloads'. Below this, the page title is 'Available Downloads' and the specific software version is 'ISW_INCA|Software_V7.2 SP 16 V7.2 SP 16'. There are three tabs: 'Files', 'Download Log', and 'Notification Log'. The 'Files' tab is active, displaying a table of files. The table has columns for 'File Description', 'File Size', 'File Added', and 'File Name'. The first row is expanded, showing a '+' icon and the file name 'INCA_V7.2_Whats-new_english'. A red circle highlights this '+' icon. Another red circle highlights the 'File Name' column header. A third red circle highlights the 'File Name' column of the first row, which shows 'INCA_V7.2_Whats-n...'. A fourth red circle highlights the 'File Name' column of the second row, which shows 'INCA_7.2_Relea...'. Below the table, there is a section for 'INCA V7.2 Service Pack 16' with a detailed description and a 'SHA256 Checksum'.

File Description	File Size	File Added	File Name
+ INCA_V7.2_Whats-new_english	9,13MB	Jan 24, 2020	INCA_V7.2_Whats-n...

5. FNP - Basic Concepts

5. FNP - Basic Concepts

5.1 Entitlements

An entitlement represents what you, the customer, have the legal right to use; it is the right to obtain one or more licenses for a product. Think of an entitlement as an account, or a store of rights to use software, from which you can redeem licenses as needed. For example, let's assume you order 10 concurrent licenses of ETAS' Software's product, ASCET Rapid

Prototyping Version 6.0.0 You will be issued an entitlement for those 10 copies, specifying the duration of validity. Each entitlement is identified by a unique Entitlement ID, and contains one or more entitlement line items. See **“Activations”** for details.

5.2 Activations

Each Entitlement contains a number of Entitlement line items that can be activated, i.e. a license can be generated for them. The Activation maps to a single product, its license terms, the number of copies entitled, and other details needed to generate a license. Activations are uniquely identified by Activation IDs.

If an Entitlement line item has been activated, the license key for it has been created.

The ETAS License Portal will show activated licenses as fulfillments. See **“Fulfillments”** for details.

5. FNP - Basic Concepts

5.3 Fulfillments

Each time a license key is activated, a fulfillment is generated. The fulfillment contains information on the product, the hosts

and the date when it was created. It is identified by a unique Fulfillment ID.

5.4 Hosts

In order to activate licenses, information on the hosts/licensed devices has to be entered:

- Machine named license: a MAC address has to be provided
- User named license: a server host or server triad as well as a user name have to be provided
- Concurrent license: a server host or server triad has to be provided

If this data changes (e.g. due to a change in hardware or users), the license needs to be “rehosted”. This procedure is described in [Chapter 2.7](#) of this manual.

5. FNP - Basic Concepts

5.5 License Keys

The license determines how, when, and where you can use a licensed product such as ASCET Rapid Prototyping. To ensure the correct usage of the license product, these information

are stored in digitally-signed, human-readable text files. This is called certificate-based licensing.

5.6 License Models

Machine named (PC Based)

- License needs to be managed by each user on his/her own
- License can be carried with the PC
- Exchanging the PC will require you to generate a new license first

Concurrent (Server Based)

- Easy and transparent license management by one server responsible
- License can be borrowed and carried with the PC if enabled
- License is available on each PC in the network
- Several users share a fix amount of licenses; availability of a sufficient amount of free licenses is not granted

5. FNP - Basic Concepts

5.6 License Models

User named (Server Based)

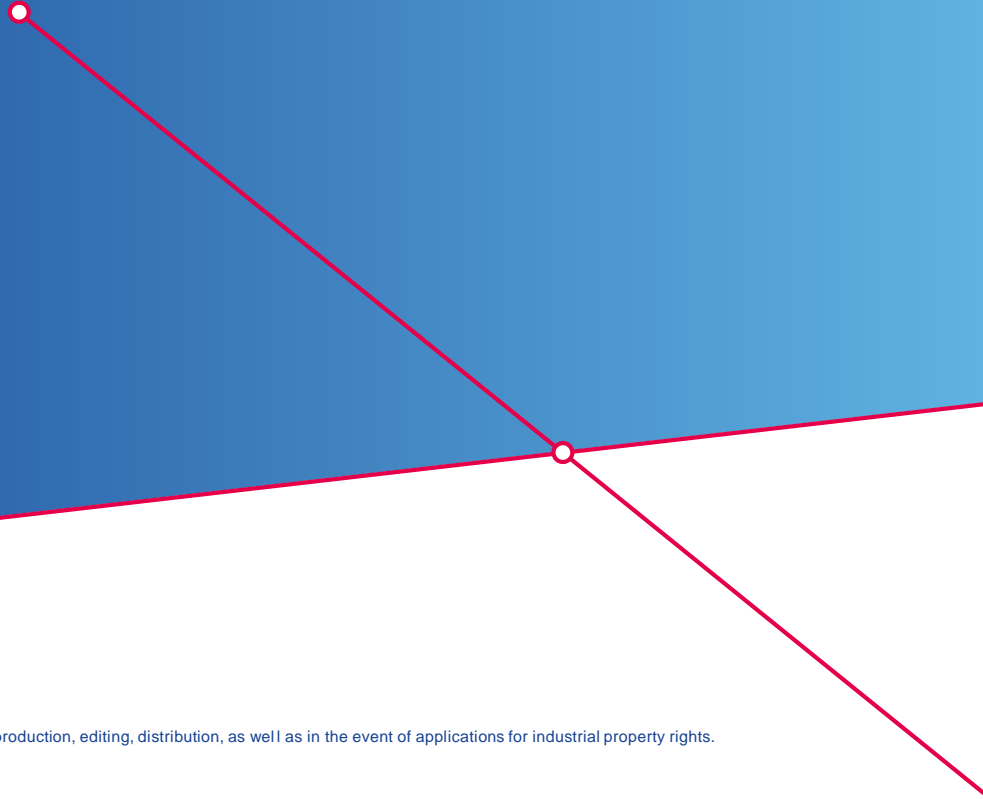

- Easy and transparent license management by one server responsible
- License can be borrowed and carried with the PC
- License is available on each PC in the network
- 100% availability for one specific user

5.7 Consolidating Licenses

Consolidating licenses will make it easier for you to manage your license files. Possible use cases are:

- A user has licenses both for the main product and the add-on
- A lot of users have User named licenses which refer to the same server
- Consolidated licenses can be rehosted in one step instead of several separate steps
- You can only consolidate licenses if they have the same MAC address

6. FNE - Basic Concepts

6. FNE - Basic Concepts

6.1 Entitlements

An entitlement represents what you, the customer, have the legal right to use; it is the right to obtain one or more licenses for a product. Think of an entitlement as an account, or a store of rights to use software, from which you can redeem licenses as needed. For example, let's assume you order 10 concurrent licenses of ETAS' Software's product, ASCET Rapid

Prototyping Version 6.0.0 You will be issued an entitlement for those 10 copies, specifying the duration of validity. Each entitlement is identified by a unique Entitlement ID, and contains one or more entitlement line items. See **“Activations”** for details.

6.2 Activations

Each Entitlement contains a number of Entitlement line items that can be activated, i.e. a license can be generated for them. The Activation maps to a single product, its license terms, the number of copies entitled, and other details needed to generate a license. Activations are uniquely identified by Activation IDs.

If an Entitlement line item has been activated, the license key for it has been created.

The ETAS License Portal will show activated licenses as fulfillments. See **“Fulfillments”** for details.

6.4 Trusted Storage

Trusted storage is a secure location bound to a particular device. In addition to its contents being encrypted, security features of trusted storage include:

- Binding, which detects if trusted storage has been copied to another device by using producer-defined system identity characteristics. When license rights are placed in trusted storage, a „fingerprint“ made of system characteristics is placed in trusted storage; when license rights are acquired, the stored fingerprint is compared to the current system’s fingerprint to detect changes.
- Anchoring, which provides trust that trusted storage has not been deleted or rolled back to an earlier state on the same device. This prevents a device from restarting a trial license if trusted storage is deleted, for example. To achieve this, another stores a small amount of data in a location that is difficult to observe or access

6.5 License Models

Machine named (PC Based)

- License needs to be managed by each user on his/her own
- License can be carried with the PC
- Exchanging the PC will require you to generate a new license first

Concurrent (Server Based)

- Easy and transparent license management by one server responsible
- License can be borrowed and carried with the PC if enabled
- License is available on each PC in the network
- Several users share a fix amount of licenses; availability of a sufficient amount of free licenses is not granted

User named (Server Based)

- Easy and transparent license management by one server responsible
- License can be borrowed and carried with the PC
- License is available on each PC in the network
- 100% availability for one specific user
